

Gustavo Olivares

Arica, Arica y Parinacota • gustavo.olivares.henriquez@gmail.com • <https://guz-dev.com/>

Education

University of Tarapacá

Arica, Chile

Bachelor's Degree in Computer and Informatics Engineering

Skills

Technical: PHP, Laravel, MySQL, Node.js, JavaScript, CSS, HTML.

Languages: Spanish and English.

Experience

Ongoing Training in Backend Development

February 2025 – Present

Self-directed learning and practical application through personal projects using PHP and Laravel, incorporating backend development best practices, REST API integration, MySQL database management, and data visualization with Google Charts. Version control is managed with Git, with a strong focus on continuously strengthening technical skills.

Municipality of Camarones

Remote

Web Developer

March 2024 – December 2024

Developed a web platform using Laravel to manage records of invoices and supplies for the pharmacy in Codpa. The platform also includes history tracking for informed decision-making based on generated reports.

University de Tarapacá "DICI"

Arica, Arica y Parinacota

Web Developer

December 2023 – February 2024

Developed a Laravel-based web application to optimize the process of lending computers through a custom-built system.

University de Tarapacá "DLO"

Arica, Arica y Parinacota

Web Developer

January 2023 – March 2023

First internship project: collaborated with two fellow students to create a Laravel web application for managing construction project reports for the University's Infrastructure Department.

Leadership

Qiri

Arica, Arica y Parinacota

Team Leader

May 2022 – June 2022

Selected as team leader among Civil Engineering in Computer Science and Informatics students to lead a multidisciplinary team composed of design and English students from the University of Tarapacá, along with three technology students from EPHEC University, Belgium. The project was carried out through online collaboration and focused on the development of a website (<https://qhapaqnan.qiri.cl/es/>) aimed at promoting the historical significance of the "Andean Road System," known as *Qhapaq Ñan*.
